Summary_

Product Designer with over 3 years of experience in complex B2B products (cloud POS, kiosks, and *enterprise back-office*) for food service in North America. I turn complex operational systems into interfaces shipped in collaboration with engineering, embedding accessibility from the start and using AI in my everyday workflow.

Experience_

Product Designer @Volanté Systems

MARCH 2024 – PRESENT · FULL-TIME

- Designed core cloud POS features requested by clients (including one with over 400 stores), taking user stories without acceptance criteria to development-ready specifications in about 1 month.
- Led design decisions in daily reviews with product and engineering, turning disagreements into comparable prototypes and advocating for solutions based on real-world use.
- Applied accessibility principles to product improvements in line with WCAG requirements and conducted interface testing on live products.
- Built design systems for two products from scratch and created an internal tool to automate responsive and accessibility specifications, reducing documentation time per delivery from 5 to 2 business days and component checks from about 1 hour to under 5 minutes.
- Established AI agent workflows for the design team: wrote 5 rules based on real failures that became mandatory checks; designed a Figma and Claude review workflow with independent verification; and turned the team's 2 design systems into 7 reusable agent skills.
- Created a daily update routine with automated review so agents always work with the latest context from Jira, Teams, and GitHub.
- Implemented a daily push routine with automated merges gated by QA so all agents work with up-to-date context.

Visual Designer @FNDE (National Fund for Educational Development)

NOVEMBER 2023 – FEBRUARY 2024 · FULL-TIME

- Created visual communications for internal teams and external audiences, using graphic design as a tool for inclusion and accessibility.
- Redesigned institutional documents with visual elements that prioritize readability and comprehension for their users.

UX/UI Designer @MAPA (Ministry of Agriculture and Livestock)

FEBRUARY 2023 – NOVEMBER 2023 · INTERNSHIP

- Shortly after joining, took ownership of redesigning a national portal that listed over 100 government systems on a single page without categories, and led all research with the departments.
- Defined the portal's information architecture with each department, organizing the systems into 8 categories. According to the IT team, access errors fell by 35% in the first quarter.
- Designed interfaces using the gov.br design system, maintaining visual consistency with other government services.
- Created onboarding materials for new team members and refreshed the visual identity of Ministry projects and initiatives, including corporate magazines.

Education_

Postgraduate degree, User Experience Design and Beyond

PUCRS (Pontifícia Universidade Católica do Rio Grande do Sul) · 2025 - 2026

BSc Bachelor's degree, Graphic Design

IESB (Instituto de Educação Superior de Brasília) · 2021 - 2023

Certifications_

WAI0.1x: Introduction to Web Accessibility

W3C (EDX) · 2026

Foundations of User Experience (UX) Design

GOOGLE · 2023

Skills_

End-to-end product design	Research and usability testing	Design systems and tokens
Complex B2B systems	Accessibility (WCAG)	Design with AI agents
Stakeholder alignment	Structured developer handoff	Mid- to high-fidelity prototyping

Tools_

Figma, Anthropic (Claude), Codex, GitHub, Jira, Notion, Framer, Adobe Creative Cloud.

Languages_

Portuguese (native), English (professional), French and Korean (beginner).
